

## Senior Sustainability Project Manager

### Who we are

Global Risk Assessment Services (GRAS) is an innovative service and information provider offering environmental and social knowledge for fully traceable and sustainable supply chains. GRAS helps agricultural producers, processors, traders, auditors, brand owners, NGOs, and investors to assess and monitor their sustainability risks. GRAS offers mapping and tracking tools, mobile apps, dashboards and databases for the verification of compliance with sustainability requirements and improvement measures.

At GRAS we are a close team of highly motivated, supportive and committed young professionals with a multitude of backgrounds. If you feel we are a fit, we are looking forward to welcoming you as **Senior Sustainability Project Manager in a permanent full-time position** in our Cologne office.

### Your Tasks

- Manage GIS and Remote Sensing projects with focus on sustainability in agricultural supply chains
- Manage projects from developing project proposals, budgeting and resource planning to solution delivery
- Initiate business development measures and benchmarking activities
- Initiate consulting projects with prospective clients
- Be responsible for idea creation and market analysis
- Develop and maintain strong client relationships and establish industry partnerships

### Your Profile

- University degree in geography, geoinformatics, agriculture, forestry, environmental science, agricultural economics or another related field
- At least 3 years of relevant work experience within sustainable agriculture or natural resources management from a geospatial perspective
- At least three years of professional experience in project management in an industry environment
- Proven professional experience in technical consultancy and proposal writing
- Very good general technical understanding and proven professional experience in geodata processing software (e.g. QGIS, ArcGIS)
- Knowledge of remote sensing methodologies, cloud computing and automation of processes is of advantage (e.g. CREODIAS, Google Earth Engine)
- Excellent language skills in English (at least C1), good Spanish and/or German language skills will be of advantage
- Excellent communication skills in an international environment with stakeholders at all levels
- Very strong presentation skills as well as the ability to explain complex issues in simple terms and to prepare professional presentations according to target group
- High degree of initiative and very good decision-making ability combined with an independent working style and pragmatic, hands-on attitude
- Excellent team building skills
- Willingness to contribute to the continuous improvement process and to drive change
- Willingness and ability to travel internationally
